

## Heavy Workbench

As a part of Treston's product range of workbenches we now introduce new Heavy Workbench. Heavy workbench is ideal choice when Heavy Duty Workshop Workbench feels a little too much, but you still require stability and good accessories.

Heavy Workbench is perfect choice for example to workshops, car repair shops or any area where you need sturdy and robust worksurface and storage for tools. Heavy Workbench comes with rear case which makes it easy to equip with uprights, perforated panels, steel shelves, bin rails and other accessories. Drawer unit 45 can be used with Heavy Workbench fixed hanging under the tabletop or even Drawer unit 45/66 with base can be used as a leg for the bench.

Heavy workbench is available in two sizes 1500x630 and 2000x630. Both available with sturdy steel top or long lasting vinyl top.

Depth 630mm allows use even in tighter places but gives still plenty of working surface. New depth also improves ergonomics since the tools hanging from perforated panel are easier to reach.

Height of the Heavy workbench is adjustable in 25 mm steps and can be equipped with castor mounting set and castors.
